

Cervical Cancers: Percent Diagnosed Advanced Stage and Proportional Incidence Ratios (PIR) for MSSAs within Orange County, 2009-2013*

Study Results								Demographics									
MSSA ID MSSA Description	Proportion Advanced Stage	Total Cases	Advanced Observed	Advanced Expected	Excess Advanced	PIR	95% C.I.	2010 Population	MSSA Designation	Federal Poverty Level (%)		Race (%)		Race (%)	Hispanic Ethnicity (%)	Primary Care Shortage Area (Yes/No)	Patient to Primary Care Physician Ratio***
115.1 Dana Point/San Clemente/San Juan Capistrano	<15 cases. See note.	110,202	Urban	Pov100 8.1 Pov200 20.4	White	83.3	19.9	No	.		
											Black	1					
											Am. Ind.	1.1					
											Other/Multi	15					
											Asian/PI	5.7					
115.2a Lake Forest East/Mission Viejo Central and South	60	15	9	6.1	2.9	147.5	91.8-237.2	108,797	Urban	Pov100 4.2 Pov200 12.9	White	78.7	17.8	No	.		
											Black	1.8					
											Am. Ind.	1					
											Other/Multi	12.9					
											Asian/PI	13.6					

* Medical Service Study Areas as defined by Office of Statewide Health Planning and Development (OSHPD).

** The proportion of advanced stage cervical cancers is significantly higher than in the comparison group (PIR p<0.01).

*** Patient to primary care physician ratio only provided for areas designated as Primary Care Shortage Areas by OSHPD. (Civilian Populaton:1 Physician).

Note: Statistical significance was not calculated for PIRs based on fewer than 15 total cervical cancer cases. Study results have been suppressed.
