Los Angeles Cancer Surveillance Program

University of Southern California Soto Street Building, Suite 305, 2001 N.Soto Street, MC 9238 Los Angeles, CA 90089-9238* *Use zip 90032 for UPS/GSO/FedEx

P: (323) 442-2300 | **F:** (323) 442-2301 https://keck.usc.edu/cancer-surveillance-program/

County: Los Angeles E-mail: asklacsp@usc.edu

Cancer Registry of Greater California

1750 Howe Ave, Suite 550, Sacramento, CA 95825 **P:** (916) 779-0300 | **F:** (916) 779-0264 http://crgc-cancer.org/

Counties: Central Region (Fresno, Kern, Kings, Madera, Mariposa, Merced, Stanislaus, Tulare and Tuolumne Counties), Sacramento Region (Alpine, Amador, Calaveras, El Dorado, Nevada, Placer, Sacramento, San Joaquin, Sierra, Solano, Sutter, Yolo and Yuba Counties) Tri-County Region (San Luis Obispo, Santa Barbara and Ventura Counties) Inland Empire Region (Inyo, Mono, Riverside and San Bernardino Counties), North Region (Butte, Colusa, Del Norte, Glenn, Humboldt, Lake, Lassen, Mendocino, Modoc, Napa, Plumas, Shasta, Siskiyou, Sonoma, Tehama and Trinity Counties), San Diego Region (Imperial and San Diego Counties) Orange County

OUR MISSION | Delivering high quality cancer data used to save and improve lives.

OUR VISION | CCR will serve the public by collecting timely, standardized, statewide data across the cancer continuum to target action toward high impact data use.

The California Cancer Registry is a collaborative effort between the California Department of Public Health, the Institute for **Population Health Improvement.** UC Davis Health Systems, and the regional cancer registries.

The California Cancer Registry California's **Cancer Registry** Reporting **System**

CANCER REGIST

The CCR advances the health of all Californians by contributing knowledge and data for cancer control research and practice efforts.

What is the California Cancer Registry (CCR)?

- The CCR is California's statewide cancer surveillance system.
- This system collects information on all* cancers and all benign brain tumors diagnosed among California residents.
- The **mission** of the CCR is to deliver high quality cancer data that is used to save and improve lives.

The **vision** of the CCR is to serve the public by collecting timely, standardized, statewide data across the cancer continuum to target action toward high impact data use.

How does the CCR work?

- In 1985, the California legislature passed a law making cancer a reportable disease.
- As of January 1, 1988, all* cancers diagnosed in California are reported to the CCR.
- As of January 1, 2001 all benign brain tumors diagnosed in California are also reported to the CCR.
- Doctors, hospitals, and other medical facilities collect data on cancer cases and report this information to the CCR.
- The CCR collates these data, performs many phases of quality control, and analyzes the data on a statewide basis.

Why is the CCR Necessary?

- · Cancers are common.
- » Nearly one out of two Californians will be diagnosed with a cancer at some point in their lives.
- » One in four Californians will die of a cancer.
- » Thousands of cancer cases and cancer deaths occur in California each year.
- Cancers data helps us understand the causes of cancers and how to prevent and treat cancers.

Whom does the CCR Benefit?

- The CCR advances the health of all Californians by contributing knowledge and data for cancer control research and practice efforts.
- Many individuals and groups in California and beyond benefit from the CCR:
- \cdot the public;
- · cancer patients and their families;
- · hospitals/health centers;
- · health professionals;
- · researchers; and
- · local and state health departments.
- * The CCR does not collect data on non-melanoma skin cancers and carcinoma in-situ of the cervix.

How are CCR Data used?

CCR data are used to:

- monitor the number of new cancer cases and cancer deaths over time;
- examine disparities in cancer risk, treatment, and survival;
- examine treatment choices and other predictors of survival;
- measure the success of cancer screening programs;
- respond to public concerns and questions about cancer; and
- · conduct research to find the causes and cures of cancer.

Researchers have used CCR data to:

- analyze geographic, racial/ethnic, and occupational differences in cancer risk;
- evaluate the quality of medical care received by cancer patients; and
- examiners patient survival with respect to cancer type, extent of disease, demographic characteristics, and other important factors.

What has the CCR accomplished?

The CCR:

- · is internationally recognized for its high quality data;
- receives major grants to investigate the causes, prevention, and cures of cancer;
- · brings millions of research dollars to California;
- provides information on cancer rates among the state's diverse race/ethnicity groups;
- · publishes special reports on many cancer types; and
- provides the public access to state, regional, and county level cancer incidence and mortality rates plus interactive maps via the internet at www.ccrcal.org.
