## Histology Coding Drills for Dx Year 2018

### SEER\*Educate New Content Announcement!

It takes three to code histology these days!

- Coding histology for Dx year 2018 forward has become more challenging.
- Guidelines as part of the Solid Tumor Rules need to be used along with ICD-O-3 Updates and the ICD-O-3 Manual.
- How do you know you are applying those Solid Tumor Rules correctly?
- **Use the newly released 110 coding exercise drills now available in SEER\*Educate.**
- Sites include: Breast, Colon, Rectosigmoid, Rectum, Cutaneous Melanoma, Head & Neck, Kidney, Lung, Malignant CNS and Peripheral Nerves, Non-Malignant CNS and Urinary sites. In the upcoming 12 months, additional exercises will be released.
- The histology coding drills are located on the SEER\*Educate main training menu under CTR Prep Tests.
  - While these coding drills do not qualify for CEs from NCRA, the exercises will benefit both experienced registrars and those studying for the CTR exam.
