Data Alert - Registrar 2019-22

Timeliness Requirement Update

CCR has re-evaluated our timeliness exclusion deadline (originally extended to 6/30/2019; further extended to 8/31/2019; and then again extended to 10/31/2018. As a result of our re-evaluation, the timeliness requirement for cases diagnosed in **2018 and forward** will be suspended one final time until **12/31/2019**.

Note: This is the final suspension of the timeliness requirement. The requirement will be reinstated effective 1/1/2020.

This exclusion does NOT apply to cases diagnosed prior to 2018. Pre-2018 cases are expected to meet timeliness requirements.

The timeliness suspension applies to both Commission on Cancer (CoC) facilities and non-CoC facilities. A future Data Alert will be distributed in December 2019 when the timeliness requirement is reinstated.
