CCR Edits Metafile Updated

A fresh copy of the CCR Edits Metafile has been released. A change log is included in the compressed file, which also contains the metafile in .emf and .rmf formats.

Please note, the previous alert incorrectly stated that it was the last update for the SEER, NPCR/NAACCR submission deadline. There are a few more releases to go; the metafile release schedule is found in the metafile ZIP archive.

Also note that this release contains the 16A NAACCR updates.
