Data Alert - Registrar 2018-02

Timeliness Requirements 2018

The following Data Alert is being distributed to update statewide abstractors on Timeliness Requirements for cases diagnosed in 2018. See [Data Alert 2017-17](#) for concurrent abstracting reminders.

Due to the magnitude of data changes for 2018 and the delay in national standard setters providing required documentation relative to 2018 data changes, CCR will be devoting significant staff resources to updating our software system. At the present time, our tentative release date is October. We do not have a firm distribution date identified for when software revisions will be implemented in our system. Therefore, timeliness requirements for cases diagnosed in 2018 will be suspended until 6/30/2019 and re-evaluated at that time. The Timeliness suspension applies to both CoC and non-CoC facilities. A future Data Alert will be distributed when Timeliness requirements are reinstated.
